#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. Claims 1-20 are pending.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a management of data comprising the steps of several data retrieval steps, a subset of data being retrieved at each retrieval step, classified in class 707, subclass 3.
  - II. Claims 7-20, drawn to a system for the management of data comprising an interface enabling the retrieval data, classified in class 715, subclass 530.

The inventions are distinct, each from the other because of the following reasons:

Inventions in Group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination Group I has separate utility such as a step for the conversion of the subset of retrieved data into a language of interoperability in the form of an elementary file, the conversion step being performed after each retrieval step. See MPEP § 806.05(d). The subcombination Group II has a separate utility that requires at least one converter of retrieved data into a language of interoperability from several elementary files, a converter being connected to each interface.

Inventions in Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions or different effects. In the instant case the different inventions are a management of data where (1) several data retrieval steps, a subset of data being retrieved at each retrieval step and (2) an interface enables the retrieval of data.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
